Outsourcing of IT services

Mad System has at its disposal resources, knowledge and potential, which will enable you to save time and money.

Outsourcing companies can be compared to the best medical specialists in their domains. We have in-depth knowledge that enables us to implement solutions effectively customised solutions for the specific Client. Thanks to this, you will focus on a faster development of your company, while being sure that all IT processes have been properly secured.

At the same time - by regarding the outsourcing company as one of the departments of your own company – you will always be updated with what is happening and ideas for changes.

8 reasons, why care for IT system is worth entrusting to specialists

Control of expenses

It You who takes a decision when and to what extent you want to implement the proposed solution.

Optimised costs

You minimise costs related to maintaining a technical department, and financial resources saved are appropriated for other purposes.

Knowledge and experience

Hundreds of implemented projects make us capable of solving every technical problem.

Increase of competitiveness

As professionals, we operate quickly and effectively. It is the end of chaos and money spent unnecessarily.

More time

Decisions related to the IT system will be taken by persons who know everything about it.

Lawfully and without risk

We watch over legitimacy and reliability of software. You do not have to remember renewal dates of licenses.

Technology

You can implement modern solutions today, without onerous recruitments and long-term trainings.

Equal opportunities

You can afford for modern software, the same that great players use.

How we make that **company begins to operate** in a **stable, secure and safe environment ready for fast** **development**

Audit, that is we define a starting point

www.madsystem.pl

01

We verify computer hardware, network devices, servers, peripheral devices and software.

02

We develop a documentation of computer network with a location of cable sockets, Wi-Fi access points, cameras and other telecommunication and IT systems.

03

We test correctness of configuration and wired network operating, and Wi-Fi in office and warehouses premises.

04

On the basis of interviews with employees, we develop a documentation of all business processes related to the IT area.

**Proposals of changes,
that is
we provide you with
specific solutions**

www.madsystem.pl

01

We make an inventory and a review of devices in your company and we present recommendations concerning a purchase of new equipment and prepare a customised offer for you.

02

We convey information about a need to implement changes, reconfigure or modify business processes related to IT area.

03

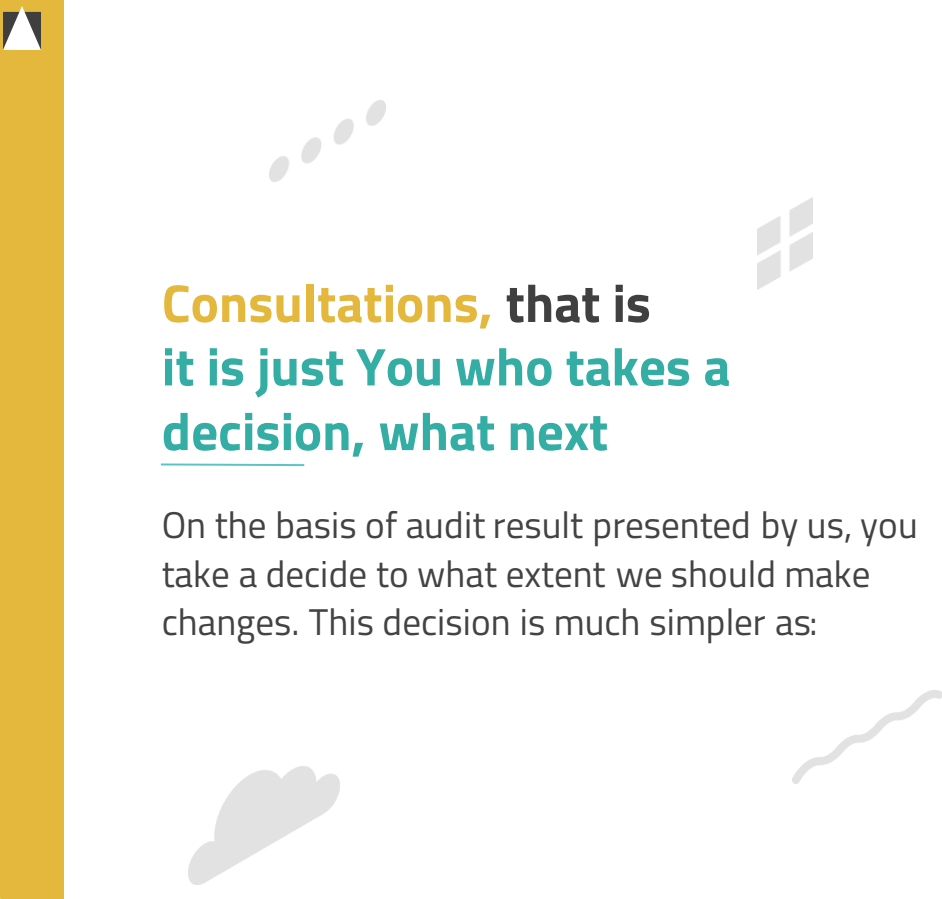

We propose an implementation of appropriate servers - Active Directory, file, application server and VPN server.

04

We propose a system of archiving in respect of data stored on servers and anti-virus software.

Consultations, that is it is just You who takes a decision, what next

On the basis of audit result presented by us, you take a decide to what extent we should make changes. This decision is much simpler as:

www.madsystem.pl

You have a full picture of situation.

You use a support and knowledge of specialists.

You know specific costs.

An implementation can be performed in several stages spread out over time.

Implementation, that is changes you have been waiting for

01

We implement solutions agreed during consultations considering changes in business processes, server installation and configuration, data security and archiving, and anti-virus protection.

02

We configure and mark each computer, peripheral device and network device.

03

We train employees.

Care, that is sense of security

www.madsystem.pl

01

We monitor and manage components of IT area 24/7.

02

We ensure service care for ICT systems.

03

We develop operating procedures that allow for better use of ICT systems.

04

We implement a technical support system for computer users.

We invite You to cooperation

Mad System has at its disposal resources, knowledge and potential that will save you time and money.
